NIKITA AGARWAL

Data Engineer | Portfolio - https://nikitaagarwal.web.app/

7002581*** | nikitaagarwal208@gmail.com | https://www.linkedin.com/in/nikita-agarwal23/ | Guwahati, Assam, India

SUMMARY

Software Engineer with 2+ years of experience in Data Engineering, Cloud Analytics, and Healthcare Data Workflows. Specialized in developing scalable ETL/ELT pipelines using Apache Airflow, DBT, and Snowflake.
Proven expertise in transforming healthcare data into actionable insights while maintaining HIPAA compliance. Strong collaborator achieving 25-30% performance improvements and 99.9% pipeline reliability.

EXPERIENCE

Software Engineer

TrieDatum

03/2023 - Present | Remote

Healthcare data analytics firm specializing in EHR, claims, and clinical data solutions

- Led end-to-end data engineering efforts across analytics platforms, progressing from production operations to senior development roles. Designed and maintained a scalable ETL/ELT pipeline processing over 10 million records daily across 500+ healthcare providers. Developed robust data quality and observability frameworks, ensuring 99.9% platform uptime. Successfully migrated enterprise DBT infrastructure to the cloud, increasing deployment efficiency by 50%. Partnered cross-functionally with privacy, compliance, and clinical teams to align with HIPAA and HITRUST standards, delivering high-impact insights to support value-based care initiatives.

Intern

Antares Tech

02/2022 - 08/2022 | Remote

Technology solutions firm focused on innovative web applications

- Developed advanced Picture-in-Picture video functionality using React and JavaScript APIs, enhancing user experience by 35%. Collaborated with frontend and UX teams to optimize video playback performance and ensure cross-browser compatibility across multiple devices.

Intern

Indian Institute of Technology

05/2018 - 07/2018 | IIT, Guwahati

Premier technical research institute

- Implemented statistical forecasting models using Python for time series analysis and predictive modelling. Developed performance-optimized C components for data transformation and conducted rigorous model validation techniques.

EDUCATION

MCA

Tezpur University

07/2019 - 06/2022

GPA 8.2 / 10

BCA

Gauhati University

08/2016 - 06/2019

GPA 8.3 / 10

CERTIFICATIONS

Snowflake - The Complete Masterclass
Udemy

Data Analysis | SQL,Tableau,Power BI & Excel | Real Projects
Udemy

SKILLS

Python | MySQL | SNOWFLAKE | DBT | Apache Airflow | AWS S3 | Git | GitHub | CI/CD Pipelines | PowerBI | Tableau | Pandas | Jira | Visual Studio Code | Shell Scripting

PROJECTS

Healthcare Data Integration Platform

Technologies: DBT, Snowflake, Python, MWAA (Apache Airflow), Healthcare APIs

- **Integrated and processed 10M+ daily records** from EHR, claims, and laboratory datasets, enabling 25% faster clinical reporting through optimized ETL pipelines and advanced query tuning
- **Implemented automated data quality frameworks** achieving 99.5% SLA compliance and reducing anomaly detection time by 40% across all healthcare data workflows
- **Developed scalable provider performance models** serving 500+ healthcare providers while maintaining zero HIPAA/HITRUST compliance violations
- **Optimized Snowflake data warehouse performance** through advanced query tuning and resource management, reducing compute costs by 20% while improving response times
- **Improved the performance and reliability** of enterprise level data processing systems to support critical healthcare reporting.

Enterprise DBT Cloud Migration

Technologies: DBT Core, DBT Cloud, CI/CD, GitHub Actions, Git

- Led migration of 200+ DBT models from Core to Cloud
- Established automated CI/CD pipelines, reducing deployment errors by 50%
- Configured role-based access controls and environment isolation for enterprise governance
- Achieved 95% team adoption rate through comprehensive training and documentation

Production Healthcare Infrastructure Monitoring

Technologies: Apache Airflow, Arena Platform, JIRA, Linux, EMR

- Monitored 50+ data pipelines across customer environments, ensuring 99.9% uptime
- Managed infrastructure optimization including EMR clusters and memory utilization
- Implemented proactive issue detection preventing 15+ potential system failures
- Achieved 4-hour average incident resolution time through systematic troubleshooting
- Enhanced overall system efficiency for mission-critical healthcare reporting
