SUMMARY

Software Engineer with 2+ years of experience in Data Engineering, Cloud Analytics, and Healthcare Data Workflows. Specialized in developing scalable ETL/ELT pipelines using Apache Airflow, DBT, and Snowflake. Proven expertise transforming healthcare data into actionable insights while maintaining HIPAA compliance. Strong collaborator achieving 25-30% performance improvements and 99.9% pipeline reliability.

SKILLS

Apache Airflow | Apache Spark | AWS (S3, EC2, EMR) | C/C++ | CI/CD Pipelines | Databricks | DBT Core | DBT Cloud | ETL/ELT | Git/GitHub | Apache Hadoop | HIPAA/HITRUST | HiveQL | JavaScript | JIRA | Linux | MWAA | Pandas | Power BI | Python | React | Snowflake | SQL | Tableau | Time Series Forecasting | Shell Scripting

EXPERIENCE

Software Engineer

TrieDatum | 04/2024 – Present

Healthcare data analytics firm

- Integrated EHR, claims, and lab data using DBT, Snowflake, and Python, processing 10M+ records daily and enabling 25% faster clinical reporting
- Built scalable patient cohorting algorithms and provider performance models supporting value-based care analytics for 500+ healthcare providers
- Automated data quality frameworks and pipeline observability in MWAA (Apache Airflow), achieving 99.5% SLA compliance and reducing anomaly detection time by 40%
- Collaborated with privacy/compliance teams to align practices with HIPAA and HITRUST standards, maintaining zero compliance violations
- Optimized Snowflake performance through query tuning, reducing compute costs by 20% while improving response times

Software Engineer

TrieDatum | 01/2024 – 03/2024

Healthcare data analytics firm

- Migrated DBT Core to DBT Cloud for 15+ engineers, enabling managed execution and enhanced collaboration with 95% adoption rate
- Established CI/CD pipelines with Git integration for 200+ DBT models, reducing deployment errors by 50%
- Configured role-based access, job isolation, and environment management aligned with enterprise governance policies
- Utilized DBT Cloud logging and alerting to improve observability and reduce issue resolution time by 30%
- Conducted comprehensive onboarding sessions and created documentation for team-wide DBT Cloud adoption

Software Engineer

TrieDatum | 03/2023 – 12/2023

Healthcare data analytics firm

- Monitored customer environments on Arena and Apache Airflow, proactively identifying issues across 50+ data pipelines
- Managed infrastructure concerns including space consumption, memory optimization, and EMR node failures, achieving 99.9% uptime
- Conducted biweekly maintenance cycles and workflow reruns, ensuring seamless platform operations
- Prepared daily status reports on Airflow DAGs, providing stakeholder visibility into platform performance
- Performed root cause analysis on failed workflows, managed JIRA incidents with 4-hour average resolution time
- Participated in 24/7 support rotations ensuring continuous coverage for mission-critical healthcare systems

Intern

Antares Tech | 02/2022 – 08/2022

Technology solutions firm

- Developed Picture-in-Picture functionality using React and JavaScript APIs, improving user experience by 35%
- Integrated React hooks for responsive video player features within web applications
- Optimized video playback performance, reducing latency by 25% and improving cross-browser compatibility
- Collaborated with frontend/UX teams to design intuitive PIP controls across multiple devices

Intern

IIT Guwahati | 05/2018 – 06/2018

Premier technical research institute

- Implemented ARIMA time series models using Python (statsmodels, pandas) for historical data analysis and forecasting
 - Developed performance-optimized C components for data transformation requiring computational speed
 - Managed code versioning with Git and conducted model validation using ACF/PACF analysis techniques
-

EDUCATION

Master of Computer Applications | Tezpur University | 08/2019 – 06/2022 | Assam, India

Bachelor of Computer Applications | Gauhati University | 08/2016 – 06/2019 | Assam, India
